JUAN VILJOEN

CLOUD ENGINEER

ABOUT

Enthusiastic about joining the world of Cloud Engineering, I am driven by a passion for cutting-edge technologies and problem-solving. My hands-on experience with AWS, combined with a strong foundation in cloud computing principles, enables me to contribute to scalable, secure, and reliable cloud infrastructures. I eagerly seek opportunities to collaborate with talented teams, optimize cloud environments, and support organizations in achieving their goals.

EXPERIENCE

PROJECTS

- **Serverless web app** built with AWS Lambda, Amazon API Gateway, AWS Amplify, S3, Amazon DynamoDB, and Amazon Cognito
- **Personal portfolio** bootstrapped with React, hosted on AWS using S3, Cloudfront, Route 53, ACM, Lambda, API Gateway and DynamoDB. https://resume.juanviljoen.cloud
- **Various API Management apps**
- **Various full stack MERN apps**
- **e-Commerce shopping cart** bootstrapped with vanilla JS
